

Veratti® 307™

ANSI Z87.1-2010
High Impact
CSA Z94.3-2007

With its sleek, bold lines design, the Veratti® 307 combines the performance of safety eyewear and the style of sport sunglasses. The frame architecture with a one piece semi-attached lens creates a cooling flow of air limiting fogging on the lenses. The high impact polycarbonate lenses protect the eyes against flying objects and harmful UVA and UVB. The rubberized nose piece and the co-injected temples allow a better grip and extended wear all day long on the job or at home.

The Veratti® 307 has a cutting edge design with a trendy translucent blue frame that will drive compliance.

Conformity to ANSI Z87.1-2010 has been assessed per ANSI/ISEA 125-2014 Level 3.
